

Leavenworth USD 453 Modernizes District Communications

The Challenge

Supporting Communication Across the District

Serving students and staff across ten locations, Leavenworth USD needed a modern voice platform that staff could depend on without the maintenance demands and downtime of its legacy phone system. Reliable communication is essential to daily operations and keeping staff connected. Allegiant Technology helped the district transition to a hosted VoIP solution that delivers clear, dependable communications while eliminating the burden of managing phone infrastructure.

Leavenworth USD migrated from a legacy Mitel on-premises phone system that required ongoing maintenance and experienced recurring downtime, creating unnecessary operational disruptions.

The district needed a communications solution that would:

- Minimize downtime
- Free IT for higher-value work
- Improve operational efficiency
- Ensure seamless connectivity
- Modernize legacy communications
- Simplify communications management
- Increase staff productivity

The Results

Dependable Voice Communications

Staff now have access to a stable cloud communications system with improved reliability and call clarity.

Less Downtime and Maintenance

The district no longer spends valuable time maintaining on-premises phone systems or addressing recurring service interruptions.

Seamless Staff Connectivity

A unified hosted voice platform helps staff stay connected and supports more consistent communication across district operations.

Focus on What Matters

With Allegiant managing the phone infrastructure, the district can focus on supporting staff, students, and daily operations.

Modern Communications. Simplified.

Customer Perspective

“Making the switch to Allegiant for our hosted VoIP services is one of the best operational decisions we’ve made. The reliability and clarity of the cloud system have drastically improved our everyday communication. What used to be a source of constant maintenance and downtime is now completely worry-free.”

“With Allegiant taking care of our phone infrastructure, our operations run smoothly, and our team has been able to redirect valuable time and focus back onto our core operations.”

“Reliable communication is critical to our operations, and Allegiant delivered exactly what we needed. Moving to their hosted VoIP solution gave us immediate system stability and seamless connectivity across our staff. Not having to manage on-premises phone systems allows us to focus our energy on serving our staff.”

Why **Allegiant Technology**

Allegiant Technology helps K–12 organizations modernize their communications and network infrastructure with secure, cloud-based solutions that improve reliability, reduce operational complexity, and free IT teams to focus on what matters most—supporting educators and students.
