

Technology Modernization Checklist

YOUR QUICK GUIDE TO STAYING AHEAD OF THE TECHNOLOGY LIFECYCLE

PERFORMANCE CRITERIA

1. Telephony / Voice Systems

- ☐ Still using PBX or systems older than 5 years?
- ☐ Employees relying on personal devices for business calls?
- ☐ Haven't explored cloud or UCaaS solutions?

2. Servers

- ☐ Servers older than 3–5 years still in use?
- ☐ Still running Server 2012 as end-of-life approaches?
- ☐ No redundancy or hybrid-ready infrastructure?
- ☐ Performance issues or frequent downtime?

3. Firewalls & Security

- ☐ Firewalls older than 3–5 years?
- ☐ Missing advanced threat detection & response features?
- ☐ Firmware/patches not consistently updated?

4. Access Points / Wireless

- ☐ Still running Wi-Fi 5 or older standards?
- ☐ Users reporting slow speeds or dropped connections?
- ☐ APs can't handle current device density?
- ☐ Do you have separate Wi-Fi for guests?

5. Switches / Networking Hardware

- ☐ Relying on unmanaged or unsupported switches
- ☐ Using 1Gbps when traffic requires 10Gbps?
- ☐ No scalability plan for future growth?

6. Windows & Software

- ☐ Still running Windows 10 as end-of-life approaches?
- ☐ Using unsupported applications?
- ☐ No OS/software refresh roadmap in place?

7. Remote Access & Endpoint Security

- ☐ Still relying on legacy VPNs without MFA or zero-trust capabilities?
- ☐ Endpoints only have basic antivirus instead of advanced EDR/XDR?
- ☐ No centralized visibility into endpoint activity?

QUICK SCORE

- ☐ 0–2 Checks: You're on track, keep monitoring
- ☐ 3–5 Checks: Time to start planning upgrades
- ☐ 6+ Checks: Modernization is urgent — act now

NOTES

NEXT STEPS

Don't wait until outdated systems slow you down or put you at risk.

Allegiant Technology can help you build a lifecycle management plan tailored to your business.
